Cianjur, West Java, Indonesia

Frontend Developer Enthusiast with a Digital Business background. Proficient in Vue.js with Nuxt.js, React.js with Next.js and Mobile Development with Flutter. Skilled in querying databases with Oracle and MySQL. Passionate about merging technology with business objectives, I specialize in crafting frontend solutions that drive user engagement and align with strategic goals.

## Work Experiences

**Satu Dental** - Jakarta Utara, Indonesia                                             Nov 2023 - Present
*Frontend Developer*

- Designed and built systems for managing clinic and lab operation, including patient records, appointment scheduling, and billing, as well as systems for lab workflows, from sample tracking to test result reporting.
- Developed a responsive mobile web application to enhance customer access to services, including booking appointments and viewing clinic location.
- Utilized modern technologies such as Typescript for type safety, Next.js for server-side rendering, Tailwind CSS for styling, and Jest for testing to deliver high-quality web applications.
- Implemented unit tests using Jest to ensure code reliability and maintainability, covering critical components and functions.
- Actively participated in Scrum rituals, both as a participant and a leader, contributing to sprint planning, daily stand-ups, sprint reviews, and retrospectives.
- Consistently completed tasks in line with the committed story points during sprint planning, ensuring reliable delivery within set timelines.
- Authored detailed documentation for implementation procedures, research findings, and user guides to support both development and end-user training.

**Antares by Telkom** - Bandung, Indonesia                                             Jan 2023 - Jun 2023
*Developer Intern*

- Developed existing low-code application using Vue.js to monitor the PLN PJB system, improving operational efficiency and system oversight.
- Resolved bugs and developed new pages for additional features, ensuring a smooth and user-friendly interface.
- Developed and maintained using existing apps to meet project requirements, facilitating seamless data communication between systems.
- Utilized Oracle MySQL for backend tasks, including database creation and management, ensuring robust data handling and storage solutions.

**Sekolah.mu** - Jakarta Selatan, Indonesia                                             Sep 2022 - Dec 2022
*Frontend Intern*

- Designed 3 website components for the front-end design system at Sekolah.mu.
- Implemented these components into Storybook to facilitate documentation and team collaboration.
- Created unit tests for each component to ensure quality and consistency in development.
- Achieved an average of 95% coverage rate in unit tests for each component, demonstrating design quality and accuracy
- Actively participated in the development and improvement of features on the payment page.
- Collaborated with the development team to implement changes and ensure the successful launch of new features.
- Utilized Vue.js to create dynamic and responsive web components, thereby increasing the application's interactivity and usability.

**AVPN Asia** - Singapore                                                             May 2022 - Aug 2022
*Frontend Intern*

- Designed user interface (UI) and user experience (UX) for the website project using Figma design tool.
- Created mockup prototypes for the website project using ReactJs, incorporating previously designed UI/UX.
- Managed mockup data using the nocode Airtable application to ensure data reliability and consistency throughout the project development.

**Univesitas Padjadjaran** - Sumedang, Indonesia                                         Apr 2022 - Jun 2022
*Teaching Assistant Web Development*

- Teaching 2 classes that consists of >40 students to practice web development coding using HTML, CSS, PHP, and mySQL with Visual Studio Code and Sublime Text.
- Arranging 2 classes schedule.
- Creating >10 quizzes.

## Education Level
