082262598163 | ihdaanwari5@gmail.com | linkedin.com/in/ihda-anwari | https://ihda-anwari.vercel.app/

Cianjur, West Java, Indonesia

Frontend Developer Enthusiast with a Digital Business background. Proficient in Vue.js with Nuxt.js, React.js with Next.js and Mobile Development with Flutter. Skilled in querying databases with Oracle and MySQL. Passionate about merging technology with business objectives, I specialize in crafting frontend solutions that drive user engagement and align with strategic goals.

Work Experiences

Ajari Technologies - Jakarta Selatan, Indonesia

Jun 2025 - Present

Frontend Developer

Startup Edutech AI Company

- Built and maintained React.js/Next.js applications integrated with AI services, leveraging WebSocket (Socket.IO) for real-time communication and REST API (async/await) for asynchronous processing.
- Contributed to a Learning Management System (LMS) project, handling bug fixes, feature improvements, and performance optimization to ensure a more stable and scalable product.
- Enhanced code quality by introducing utility functions, standardized styling, and best practices with Tailwind CSS, improving team productivity and maintainability.
- Worked with international clients, including projects from Azerbaijan, adapting to diverse requirements and distributed collaboration.
- Tech stack: React, Next.js, Tailwind CSS, Redux, Zustand, i18n, Socket.IO.

Pelindo Solusi Digital - Jakarta Utara, Indonesia

Oct 2024 - Jun 2025

Software Developer

Subsidiary of Pelindo Group, focused on port digitalization.

- Conducted R&D on emerging technologies, including mobile framework comparisons, and developed boilerplates for mobile (Flutter) and web (Next.js).
- Evaluated and recommended frontend technologies, producing documentation and technical guidelines for internal teams.
- Developed a prototype machine learning solution for traffic congestion at Tanjung Priok Port, building a vehicle detection and counting system with Python (YOLOv7 by WonkyKyu), MQTT for IoT communication, and a Go service to process and store data in MongoDB.
- Successfully delivered the project at prototype stage, demonstrating feasibility for large-scale deployment.
- Tech stack: Flutter, Next.js, Python, YOLOv7, MQTT, Go, MongoDB.

Satu Dental - Jakarta Utara, Indonesia

Nov 2023 - Oct 2024

Frontend Developer

Startup Dental Clinic

- Designed and built systems for managing clinic and lab operation, including patient records, appointment scheduling, and billing, as well as systems for lab workflows.
- Developed a responsive mobile web application to enhance customer access to services, including booking appointments and viewing clinic location.
- Utilized modern technologies such as Typescript for type safety, Next.js for server-side rendering, Tailwind CSS for styling, and Jest for testing to deliver high-quality web applications.

Antares - Bandung, Indonesia

Jan 2023 - Jun 2023

Developer Intern

Subsidiary of Telkom Indonesia, IoT Company

- Developed existing low-code application using Vue.js to monitor the PLN PJB system, improving operational efficiency and system oversight.
- Resolved bugs and developed new pages for additional features, ensuring a smooth and user-friendly interface.
- Developed and maintained using existing apps to meet project requirements, facilitating seamless data communication between systems.
- Utilized Oracle MySQL for backend tasks, including database creation and management, ensuring robust data handling and storage solutions.

AVPN Asia - Singapore

May 2022 - Aug 2022

Frontend Intern

Social Impact Company

- Designed user interface (UI) and user experience (UX) for the website project using Figma design tool.
- Created mockup prototypes for the website project using ReactJs, incorporating previously designed UI/UX.
- Managed mockup data using the nocode Airtable application to ensure data reliability and consistency throughout the project development.

- Designed 3 website components for the front-end design system at Sekolah.mu.
- Implemented these components into Storybook to facilitate documentation and team collaboration.
- Achieved an average of 95% coverage rate in unit tests for each component, demonstrating design quality and accuracy
- Collaborated with the development team to implement changes and ensure the successful launch of new features.
- Utilized Vue.js to create dynamic and responsive web components, thereby increasing the application's interactivity and usability.

- Teaching 2 classes that consists of >40 students to practice web development coding using HTML, CSS, PHP, and mySQL with Visual Studio Code and Sublime Text.
- Arranging 2 classes schedule.
- Creating >10 quizzes.

Education Level

- Received an A grade in UI/UX, Web Development, Web & Mobile Technology courses
- Received an A grade in Business Intelligence, Digital Marketing, and Social Media Management
- Successfully published a journal article on predictive analysis using machine learning, titled "Penggunaan Machine Learning Untuk Prediksi Harga Telur Ayam Ras Di Kota Bandung" which was indexed by Sinta 4
- Become the best student by winning the cum laude award

Organisational Experience

- Manage and organize all social media posts including designing, publishing and draftingCreating website for PKM
- Become the best staff in the second period

- Managed and organized all social media posts, resulting in a significant increase in engagement, including a gain of 704 Instagram followers, 339 YouTube subscribers, and a total of 11,000 views

Publication, Skills, Achievements & Other Experience

- **Publication** (2023): Anwari, I., & Yulita, I. N. (2023). Penggunaan Machine Learning untuk Prediksi Harga Telur Ayam Ras di Kota Bandung. Community Development Journal: Jurnal Pengabdian Masyarakat, 4(3). <https://doi.org/10.31004/cdj.v4i3.17689>
- **Achievements** (2019): Awardee of Jabar Future Leaders Scholarship
- **Tech Hard Skills:** NextJs, Laravel with InertiaJs, VueJs, ReactJs, Flutter, Typescript, Javascript, Python, MySQL, Oracle, OOP
- **Business Hard Skills:** Creating a dashboard with Tableau, creating associative analysis for recommendation with KNIME, familiar with social media tools analytics
- **Language Skills:** English - Proficient
- **Language Skills:** Bahasa - Native
- **Design Hard Skills:** Familiar with design tools like Figma, Adobe Photoshop, Adobe Illustrator, Coreldraw, Canva
- **Course** (2022): Taking the Front-End Track at Generasi Gigih Program from Yayasan Anak Bangsa Bisa & GoTo, selected as one of the top 12% (1 of 146) for an internship opportunity from a pool of 1,200 participants in the Generasi Gigih program.
